

FIRST  
ON THE  
WATER™

**PASSENGER SEAT MOUNT**  
**Item # 1238 / 1239**

**Contents:**

- (1) Seat Passenger Seat Plate
- (2) U-bolts
- (4) Washer and Locking Nuts.

1. Set the plate channel side down over any cross bar.
2. Slip the U-bolts over the tube and up through the holes in the plate on each side of the channel.
3. Add the washers and lock nuts on to the top of the U-bolts. Tighten the self-locking nuts equally so that the same amount of the U-bolt is visible above the top of each nut. Make sure these are tightened securely.
4. Bolt the seat in place. Tighten the seat bolts securely.
5. Periodically check the tightness of all nuts and bolts. The U-bolts can be tightened without removing the seat by using a 1/2" or 13mm open-end wrench. The wrench will fit between the base of the padded seat and plate which are separated by the nylon spacer disks.
