

NRS CASTING PLATFORM

Components:

- (1) Pre-assembled Platform
- (2) Bent Hanger Bars
- (4) U-Bolts
- (8) Washers and Locking Nuts

Directions:

1. Install the U-bolts into the platform LoPros. It may be necessary bend the horns of the U-bolts so that they line up with the holes in the LoPros. This small amount of bending can usually be done by hand.
2. Place the hanger bars onto the platform LoPros and add the nuts and washers, but don't tighten them yet.
3. Position the platform in front of the raised seat bar. The LoPro on the hanger bar should line up with the angled parts of the seat bar. The bars on the platform can be moved from side to side to aid in lining up the castings.
4. Once everything is lined up, install the U-bolts in the hanger bar LoPros and tighten all of the lock nuts.
5. To ensure the longevity of these and all frame parts, periodically check the tightness of all the nuts and platform bolts.
