## Featuring NRS Titanium Co-Pilot Knife & NRS Un-Pin Kit.

NRS Titanium Co-Pilot

NRS Un-Pin Kit

### Stuff for the Steeps

**NRS Titanium Co-Pilot Knife**  
Lightweight, stronger than steel, corrosion-resistant and holds an edge almost indefinitely, titanium makes for the ultimate river knife. The Co-Pilot features smooth and serrated blade sections, blunt safety tip cum screwdriver, and an easy-to-use squeeze-release sheath.  
\$110 US. [www.nrsweb.com](http://www.nrsweb.com)

**Stohlquist Descent PFD**  
The Descent is a full-featured rescue vest that fits more like a freestyle PFD. Body-hugging Wrapture foam, neoprene side panels, free-floating shoulder straps and a low-cut front allow liberating range of motion. Safety features include a quick release rescue belt and large chest pocket.  
\$200 US. [www.stohlquist.com](http://www.stohlquist.com)

**Liquidlogic Speedloader Throw Bag**  
After head-to-head testing against every throw bag we could scrounge, the Speedloader won hands-down in both speed and ease-of-use. The bag's super wide mouth and three-sided bowl design make it a breeze to re-stuff in a hurry. 50- and 75-foot models.  
\$60 US. [www.liquidlogic.com](http://www.liquidlogic.com)

**Level Six Armour-All Elbow Pads**  
Don't wait until your first elbow injury to get protection. The Armour-All is a comfortable, low profile option that blends a hard shell and soft padding for maximum freedom of movement. The sleeve design eliminates questionable Velcro attachments.  
\$55 CDN. [www.levelsix.com](http://www.levelsix.com)

**NRS Pin Kit**  
Responsible creeking means being prepared. NRS makes it easy to carry everything you need to set up a haul system for recoveries and rescues. Kit includes: 70-foot throw bag, webbing sling, two prussiks, four 'biners, two pulleys, waterproof Z-drag crib notes and a small storage bag.  
\$185 US. [www.nrsweb.com](http://www.nrsweb.com)

**WRSI Pinch Face Protection System**  
Broken noses are regrettably common creeking injuries. Whether the assailant is a rock or your own paddle, a full-face helmet is that ounce of prevention your mom lectured you about. Budget boaters should check out WRSI's Pinch system—the lightweight mask snaps onto any 2007 and newer WRSI helmet (Current shown here). \$40 US. [www.wrsisafety.com](http://www.wrsisafety.com)

**Sawyer Sidewinder Paddle**  
Released last year, the Sidewinder features durable wood, carbon and fiberglass blend construction with a creeking specific design. A unique Bow Curve bent shaft and large blades deliver power for quick acceleration. Blades are angled slightly forward to enhance the foot stroke and rolling.  
\$300 US. [www.paddlesandoars.com](http://www.paddlesandoars.com)
